RCC Summer Camp for Kids

Sports Academy
An instructional sports camp for girls and boys. Our goal is to create a safe environment that promotes fun and builds athletic skills. Sports may include: baseball, basketball, softball, handball, soccer, swim, gym sports, tennis, and lacrosse.

Art Institute
Children learn to express themselves in an exciting environment that encourages creativity and imagination. Various art mediums are explored with unique projects each week that challenge and delight the young artists.

Computers
Campers who love using computers will learn about new programs and work on digital projects, programming, 3D animation, and video game development. Campers will have opportunities to put their skills to the test with hands-on-projects.

Performing Arts
An enthusiastic and supportive environment with professional level instruction in singing, dancing and acting. Campers enjoy the thrill of practicing and performing in RCC’s celebrated Cultural Arts Theater as they produce their own creations and perform top Broadway songs and dance.

Science
Are you curious about the world? Learn about scientific thought and methods while exploring the most interesting principles of biology, chemistry and physics. Using a hands-on approach in a real college laboratory, campers will experiment and create everything from robots to rockets.

Here’s what one parent said:
My son has been going to the computer camp for the past 5 years. Friendships with counselors and campers have endured through all these years. He looks forward to coming each year and learning something new. Not only is it fun, but the added, music, cooking, photography; and drama classes add flavor. The added bonus of a cafeteria has made my child more willing to try new foods and become independent. They learn to be part of something fun and they learn to build their own confidence. Can’t wait for him to return and start a new adventure. Thanks RCC!!!
-Fezin Patel - Satisfied Mom
